This listing of claims will replace all prior versions, and listings, of claims in the application:

1   Claim 1 (currently amended): A color reproduction system
2   comprising:
3   a color image input section; and
4   a color correcting section for correcting colors of
5   an image of a subject obtained by photographing the
6   subject by the color image input section, wherein
7   the color correcting section corrects colors by
8   changing over a plurality of color correction parameters
9   ~~according to~~ <u>using, at least, information inherent in a</u>
10   subject image signal from the color image input section.

1   Claim 2 (currently amended): A color reproduction system
2   ~~according to claim 1, wherein~~ <u>comprising</u>:
3   <u>a color image input section; and</u>
4   <u>a color correcting section for correcting colors of</u>
5   <u>an image of a subject obtained by photographing the</u>
6   <u>subject by the color image input section, wherein</u>
7   the color correcting section comprises:
8   an object recognizing section for dividing a subject
9   image input from the color image input section into
10   images of a plurality of areas, and selecting a suitable
11   input profile from among a plurality of input profiles
12   for each divided area;
13   a device-independent color converting section for
14   converting an image of each area into a
15   device-independent color image by using the input profile
16   selected from among the plurality of input profiles;

17   an image combining section for combining the

18   device-independent color images converted at divided

19   areas into one device-independent color image; and

20   a device value image converting section for

21   converting the combined device-independent color image

22   into an output device value image by using a

23   predetermined output profile.

1   Claims 3-9 (withdrawn)

1   Claim 10 (original): A color reproduction system

2   according to claim 2, wherein the input profile is

3   prepared based on at least one of image input unit

4   information that includes photographic characteristics of

5   an image input unit used for the photographing and

6   information on a set state of the color image input

7   section, observation illumination light information, and

8   subject characteristic information that represents

9   statistical characteristics of spectral reflectances of

10   the photographed subject.

1   Claims 11-15 (withdrawn)
